

# POSICAP Automatic Cap Tightening

universal

FILLING MACHINE COMPANY

- Versatile automatic cap tightening
- Wide range of bottle sizes
- 10 – 100mm cap diameter
- In line gating - no star-wheels
- ROPP capping option
- Crimping for spray pumps option
- Trigger & pump sprays
- PLC controlled, fibre optic sensors
- ATEX certified versions available
- Up to 40 bottles per minute

fulfilling your needs

The Posicap in-line cap tightening machine, like all Universal equipment is robustly constructed in stainless steel. It is capable of tightening a wide range of caps (10-100mm dia.) at speeds of up to 40 containers per minute. The machine is plc controlled & fitted with a torque regulator for consistent cap tightening. Simple cap head height adjustment & quick change jaws facilitate fast product changeovers, reducing down time to a minimum whilst the in-line gating system eliminates the need for expensive change parts. The Posicap can be integrated into existing filling lines or mounted on its own conveyor system.

For high speed capping solutions, Universal work with a number of UK & overseas partners & can provide fully integrated systems, including automatic cap feeding & placing, for speeds of up to 100 containers per minute.

**The Posicap comes complete with the following standard equipment:**

- 304 stainless steel chassis & conveyor
- 3 metre variable speed slat chain conveyor system
- Fully interlocked safety guards to CE standards
- Fully adjustable container guide rails
- Inline container gating (no change parts required for bottle change)
- Fibre optic PLC controlled bottle detection
- Tool free height adjustment
- Pneumatic container clamp assembly

**Optional Equipment:**

- Adaptor for trigger sprays
- Stainless steel conveyor slat chain
- ATEX certified for use in hazardous areas
- Press on & screw on capping options
- Puck return systems
- Conveyors to suit any application
- ROPP capping
- Crimping heads for spray pumps
