

# Posimatic EV 1000

FULLY-AUTOMATIC VOLUMETRIC FILLING MACHINE

**The Posimatic EV1000 liquid filling system is one of the most versatile liquid filling systems available.**

Its single container handling module can be combined with any of Universal's liquid filling systems (volumetric or vacuum) to provide a very cost effective automatic liquid filling solution.

The machine has been designed to be simple to set up and operate. As a result, it requires no specialist technical skills.

A wide range of containers can be handled without the need for change parts.

## Key Benefits

- In-line format eliminates need for expensive change parts
- Ergonomically designed for easy access for rapid changeovers and cleaning
- Tool-free speed and fill adjustment
- Fully adjustable dive unit for neck entry or bottom-up filling
- No container/no fill system
- Suitable for handling a wide range of container shapes and sizes
- Does not require highly trained operators
- Simple to use and maintain

## Specifications

- Fills liquids, semi-liquids and liquids with particulates
- Available format: 2, 4, 6, 8 or 12 heads
- Dispensing volumes: 5ml – 1,300ml
- Filling speeds: Up to 100 b.p.m.
- Fill accuracy: Up to +/- 0.5%
- Food and pharmaceutical quality stainless steel contact parts
- ATEX certified versions available

## Options available

- Full-Diving Nozzle for bottom-up filling
- Range of product feed and break tank sizes
- Rotary infeed and collecting tables
- Pneumatically operated shut-off hoses
- Rotary valves for viscous products, or liquids containing particles
- ATEX compliant version
- Extended conveyor systems
